

About Seacove Homes

A summary

Seacove Steel has been in business on the Sunshine Coast since 1997 and was taken over by the present owner, Colin Patience in July 2003.

In 2005 we moved into new purpose built offices & factory at 19 Production Street, Noosaville. Our new workshop & facilities have been equipped to not only undertake the increased diversity of steel work but also to manufacture and assemble the Seacove Homes modules and roof panels

In 2011 Seacove Homes launches its '**SMART**' range with a modified roof pitch but keeping the feature of raked ceilings throughout. Some other simple changes have made the new standard Seacove Homes SMART range more economical, simpler and therefore even faster to build, and complete on site.

Facts
